[The origin on why '%20' is used as a space in URLs](#)

I am interested in knowing why '%20' is used as a space in URLs, particularly why %20 was used and why we even need it in the first place.

[A html space is showing as %2520 instead of %20](#)

312 A bit of explaining as to what that %2520 is :
The common space character is encoded as %20 as you noted yourself. The % character is encoded as %25. The way you get

URL encoding the space character: + or %20?

As the aforementioned RFC does not include any reference of encoding spaces as +, I guess using

%20 is the way to go today. For example, "%20" is the percent-encoding for the binary

[C# How to Encode URL space with %20 instead of](#)

How to encode query string space with %20 instead of + ? Because System.Web.HttpUtility.UrlEncode() gives the space with +.

[How to run Cronjob like every 20 minute of every hour from 8:20-23:00?](#)

my current cron-job is scheduled as ("0,20,40 8-23 * * *") which runs At minute 20, 40, and 0 past every hour from 8 through 23. My cron-job begins at 8:00am but I want to begin at 8:20 instead.

[Off-Grid Solar Containers , Energy Independence](#)

From remote mountain cabins to desert ranches, hunting retreats to permanent homesteads-if you can get a 20-foot container there, we can power your life.

[In a URL, should spaces be encoded using %20 or +?](#)

@MetaByter I think it is more technically correct to phrase the question as "In a URL, should I encode the spaces using %20 or + in the query part of a URL?" because while the example you show

Instant Off-Grid(TM) Shipping Containers with Solar and Batteries and AC+

[When should space be encoded to plus \(+\) or %20?](#)

Sometimes the spaces get URL encoded to the + sign, and some other times to %20. What is the difference and why should this happen?
