

# 545 solar panel size and power

The image shows a house with solar panels on the roof. In the foreground, there is a battery storage system consisting of six stacked units. Each unit has a digital display and control buttons. To the right of the battery units, there are four circular icons: a hand pointing to a button, a globe, a battery with a lightning bolt, and a bell with a lightning bolt. Below these icons are four lines of text: 'easy to install and use', 'World wide Products', 'faster charging and discharging', and 'Multiple protection with alarm systems'. Below the text is a large heading 'Can save energy' followed by two paragraphs of smaller text: 'the battery capacity can be increased freely and flexibly according to the situation of home use.' and 'Rechargeable lithium batteries use safe LiFePO4'.

easy to install and use

World wide Products

faster charging and discharging

Multiple protection with alarm systems

## Can save energy

the battery capacity can be increased freely and flexibly according to the situation of home use.

Rechargeable lithium batteries use safe LiFePO4

## Overview

---

A system producing 545 panels rated at 300 watts each can theoretically generate up to 163.5 kilowatts of power; however, actual performance can be affected by variables such as shading and temperature.
