

Biofuels renewable energy

Voltage range

636V-876V

Rated voltage

768V

Cell type

Lithium iron phosphate

Biofuels renewable energy

Microsoft Word

The European Commission, Airbus, and high-level representatives of the Aviation and Biofuel producers industries, launched the European Advanced Biofuels Flightpath. This action is scheduled to achieve

Energy

This Commission department is responsible for the EU's energy policy: secure, sustainable, and competitively priced energy for Europe.

Voluntary schemes

Voluntary schemes set standards for the production of sustainable biofuels, bioliquids and biomass fuels.

Biofuels

Biofuels and biogas in co-processed fuels The Commission adopted in June 2023 new rules establishing the share of biofuels and biogas in mixed fuels, co-processed using bio-based and

[EU Database for Biofuels becomes operational](#)

The Union database is a global traceability tool to trace consignments of renewable and recycled carbon fuels and the respective raw materials used for their production - from the point of

[union-database-for-liquid-and-gaseous-renewable-and-recycled](#)

The scope of traceability encompasses all liquid and gaseous renewable fuels, including biofuels and sustainable gases such as biomethane, renewable hydrogen from biological or non

[Commission concludes examination of potential Chinese biofuel](#)

The Commission has concluded its examination of fraud allegations notified by the German authorities in 2023 in relation to biodiesel imports from China.

[The land use change impact of biofuels consumed in the EU](#)

As Indirect Land Use change (ILUC) can only be modelled not measured, the aim of this study was to model land use change and its greenhouse gas emissions related to biofuels consumed

Secondary legislation clarifies contribution of biofuels to renewables

This co-processing methodology enables economic operators to calculate the contribution of biofuels and biogas to the renewable energy target in transport by determining what proportion is

DOE Explains Biofuels

Biofuels are liquid fuels produced from renewable biological sources, including plants and algae. Biofuels offer a solution to one of the challenges of solar, wind,

Bioenergy

Biofuels Produced in a sustainable way, biofuels provide a renewable alternative to fossil fuels in the transport sector.
