

Couplet on solar power generation

Overview

Yet, the share of solar energy in global energy supply, especially in the electricity sector, is rising rapidly. Unprecedented deployment has taken place in the last decade, stimulated by efforts to improve energy access, security of supply and mitigate climate change.

Couplet on solar power generation

Solar Power Generation

With growing environmental concerns over the climate change risks associated with power generation using fossil fuels, solar power generation has emerged as one of the most rapidly growing renewable

Solar power generation couplet

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest-growing source of
