

Danish vanadium energy storage project

Overview

The project is on rechargeable batteries for large scale energy storage, where a solution of vanadium is used to hold the energy. A danish produced stack (battery assembly) will be developed, and a system will be demonstrated where 100 kWh of power can be stored.

Danish vanadium energy storage project

Danish language

Danish itself can be divided into three main dialect areas: Jutlandic (West Danish), Insular Danish (including the standard variety), and East Danish (including Bornholmian and Scanian).
