Grid parity solar module prices

Grid parity

Grid parity is most commonly used in the field of solar power, and most specifically when referring to solar photovoltaics (PV). As PV systems do not use fuel and are largely maintenance-free, the levelized cost of electricity (LCOE) is dominated almost entirely by the capital cost of the system. With the assumption that the discount rate will be similar to the inflation rate of grid power, the levelized cost can be calculated by di
