

# How high should the wind turbine blades be installed

## Overview

---

The American Wind Energy Association recommends placing the bottom edge of the rotor blade at least 30 feet above any trees or buildings within a 500-foot radius. Such barriers would otherwise slow wind speed and create turbulence, causing undue wear on a turbine and reducing.

## How high should the wind turbine blades be installed

### Wind Turbines: the Bigger, the Better

A wind turbine's hub height is the distance from the ground to the middle of the turbine's rotor. The hub height for utility-scale land-based wind turbines has increased 83% since 1998-1999,

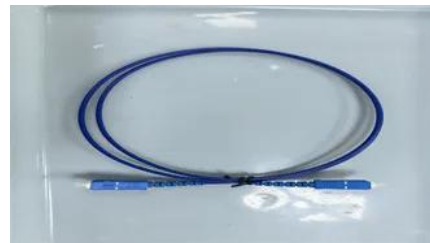

### HIGH Definition & Meaning , Dictionary
