[The small island states making big strides towards net zero](#)

Pacific small island states, contributing only 0.03% of global emissions, are leading with ambitious renewable energy projects and net-zero goals by 2050.

[AC Microgrids Protection: A Digital Coordinated](#)

In this paper, a comprehensive and coordinated protection scheme based on digital PDs to efficiently satisfy protection coordination requirements in

[Microgrids can secure electricity supply during disasters . World](#)

Renewables-based microgrids and peer-to-peer (P2P) energy trading can boost energy security as they are self-sufficient and run independent of large grids.

[This bike path in the Netherlands is made from plastic waste](#)

Dutch cyclists rode down the world's first bike path made entirely of discarded plastic this week, in a move aimed at reducing the millions of tonnes wasted every year.

[How to finance battery energy storage . World Economic Forum](#)

Battery energy storage systems can address the

[Control-based protection design for microgrids: A comprehensive review](#)

Many existing control-based protection schemes, particularly those based on harmonic control, are designed to be only applicable to islanded microgrids, assuming that faults during grid

challenge of intermittent renewable energy. But innovative financial models are needed to encourage deployment.

Microgrid Protection Systems

Hybrid Microgrids contain one or more AC and DC sub-grids, which contain AC or DC loads respectively, as well as DERs. Hence, a hybrid microgrid can exploit the salient features of both AC

[Review of Networked Microgrid Protection: Architectures, Challenges](#)

Design and selection of advanced protection schemes have become essential for reliable and secure operation of networked microgrids. Various protection schemes that allow correct operation of

[These Dutch microgrid communities can supply 90% of their energy](#)

Local communities generating their own power could become 90% energy self-sufficient, with potential to be fully self-reliant in the future, according to a Dutch study.

[The start-up tackling Nigeria's reliable power challenge , World](#)

Amid an electricity crisis, many Nigerian small businesses run on petrol generators. This solar-microgrid start-up is working to connect them to clean energy.

[The Future of Jobs Report 2025 , World Economic Forum](#)

Technological change, geoeconomic fragmentation, economic uncertainty, demographic shifts and the green transition - individually and in combination are among the major drivers

[Comparative framework for AC-microgrid protection schemes](#)

This study offers various real MGs and accompanying protection systems as practical applications, demonstrating the most frequently used protection schemes.

[How buildings can solve energy security as demands surge](#)

Surging energy demands and prices of buildings are turning leaders to efficiency retrofits to reduce energy costs and improve long-term energy security.

[Designing a Protection Scheme in Micro-Grid Systems with DG](#)

Microgrid Central Protection Unit (MCPU) communicates with every single relay and distributed generator in the microgrid. The communication with relays is necessary to update the operating

[Design Protection Schemes for 100% Renewable Microgrids](#)

The protection design for the microgrid is adaptive and communication-based. Adaptiveness is necessary due to different current levels in grid-connected/islanded operation and

[AC Microgrid Protection Schemes: A Comprehensive Review](#)

Several protection schemes have been proposed to improve the protection system when microgrids are present. DC/AC systems, communications infrastructures, rotating synchronous machines, and

[Advanced protection technologies for microgrids: Evolution](#)

Challenges and solutions in implementing advanced microgrid protective systems are examined. This paper delves into the evolution of microgrid protective devices, addressing the critical

[The recent development of protection coordination](#)

Table 2 provides a brief overview of the advantages and limitations of the main two microgrid protection approaches: standard overcurrent schemes

[5 facts you should know about the Strait of Hormuz](#)

Normally, a fifth of global gas and oil trade passes through this chokepoint. That's 20 million

barrels of oil a day. But why are people talking so much about this one small waterway - and how

[What are microgrids - and how can they help with power cuts?](#)

Microgrids can step in when the main electricity grid fails. And as they can be powered by renewables, they are a sustainable and affordable option, too.
