Safety is prioritized through a 30A Battery Management System (BMS) that monitors and regulates cell performance. The BMS safeguards

against overcharge, over-discharge, short circuits,

[25 Battery Management System \(BMS\) Manufacturers](#)

This section provides an overview for battery management systems (bms) as well as their applications and principles. Also, please take a look at the list of 25

**Battery management system**

A battery management system (BMS) is any electronic system that manages a rechargeable battery (cell or battery pack) by facilitating the safe usage and a long life of the battery in practical scenarios while monitoring and estimating its various states (such as state of health and state of charge), calculating secondary data, reporting that data, controlling its environment, authenticating or balancing it. Protection circuit module (PCM) is a simpler alternative to BMS.
