[Welcome to Himel : Products of today, ready for tomorrow](#)

HIMEL is a multinational manufacturer and provider of robust, reliable & safe electrical products. Our mission is to make efficient and reliable power easily

### When to use "new" and when not to, in C++?

You should use new when you wish an object to remain in existence until you delete it. If you do not use new then the object will be destroyed when it goes out of scope.

[New site design and philosophy for Stack Overflow: Starting February](#)

Ah, but new experts will rise up and embrace the new, friendly Stack Overflow that they have always wanted. And maybe rediscover the same things the bitter, hateful old guard found.

[Difference between 'new operator' and 'operator new'?](#)

A new expression is the whole phrase that begins with new. So what do you call just the "new" part of it? If it's wrong to call that the new operator, then we should not call "sizeof" the sizeof

[What is the Difference Between 'new object\(\)' and 'new {}' in C#?](#)

Note that if you declared it `var a = new { };` and `var o = new object();`, then there is one difference, former is assignable only to another similar anonymous object, while latter being object, it

## new operator

In the specific case of throw, `throw new()` is a shorthand for `throw new Exception()`. The feature was introduced in c# 9 and you can find the documentation as Target-typed new expressions.

## [Shanghai Dada Electric Co., Ltd. presents innovative circuit breakers](#)

In April 2025, Dada Electric will present its latest products at the Middle East Power Exhibition (MEE) in Dubai and the Canton Fair in China. These events provide a great opportunity for industry

## javascript

`new()` describes a constructor signature in typescript. What that means is that it describes the shape of the constructor. For instance take `{new(): T; }`. You are right it is a type. It is the type of a class

## [How does the new operator work in JavaScript?](#)

The new operator uses the internal `[[ ]]` method, and it basically does the following: Initializes a new native object Sets the internal `[[ ]]` of this object, pointing to the Function prototype

This guide decodes the top 10 Chinese circuit breaker manufacturers by what matters most to international buyers: export readiness, actual

### [Is JavaScript's "new" keyword considered harmful?](#)

It is NOT 'bad' to use the new keyword. But if you forget it, you will be calling the object constructor as a regular function. If your constructor doesn't check its execution context then it won't notice that 'this'
