

NiMH battery industrial and commercial energy storage system

easy to install and use

World wide Products

faster charging and discharging

Multiple protection with alarm systems

Can save energy

the battery capacity can be increased freely and flexibly according to the situation of home use.

Rechargeable lithium batteries use safe LiFePO₄

Overview

Work on NiMH batteries began at the -Geneva Research Center following the technology's invention in 1967. It was based on $Ti_2Ni+TiNi+x$ alloys and NiOOH electrodes. Development was sponsored over nearly two decades by and by within Deutsche Automobilgesellschaft, now a subsidiary of. The batteries' specific energy reached 50 W·h/kg (180 kJ/kg), specifi.
