

Rural photovoltaic panels are 4 meters above the ground

Overview

There is no restriction on the size of ground-mounted solar-panel arrays in rural zones and you do not need a building consent as long as the array: the design wind speeds do not exceed 44 metres per second, or the array is in a wind zone rated no greater than "high".

[How High Should Solar Mounting Systems Be?](#)

If you're unsure about the right height, start with 1-2 meters-it's safe, stable, and works in 80% of use cases.

Agrivoltaic Designs and Configurations

The higher the solar panels are installed off the ground, the more wind loading on the system will impact the design. Water and rain runoff from the panels may also impact land and/or farming practices
