Energy

This Commission department is responsible for the EU's energy policy: secure, sustainable, and competitively priced energy for Europe.

[In focus: Solar energy - a shining star of Europe's clean transition](#)

A range of solar technologies are available to harness the sun's energy in different ways. Solar photovoltaic (PV) panels, comprised of individual solar cells, convert sunlight into electricity.

Solar energy

In 2024, the EU output of photovoltaic electricity accounted for 11% of the EU's gross electricity output, according to Ember. Continued growth in the solar energy sector is expected in the

[Commission supports European photovoltaic manufacturing](#)

The charter sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

European Solar Charter

In 2023, the solar photovoltaic sector in the EU and globally saw the prices of the panels plummet from ca. 0.20 EUR/W to less than 0.12 EUR/W. This unsustainable situation is weakening

Renewable energy targets

The targets have evolved consistently since first established to help the EU reach its ambitious energy and climate goals.

European Solar Charter

The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

Solar energy in buildings

The revised Energy Performance of Buildings Directive will speed up the uptake of solar photovoltaics and solar thermal - both on residential and non-residential buildings - and increase the possibilities

Renewable Energy Directive

The renewable energy directive is the legal framework for the development of renewable energy across all sectors of the EU economy, and supports cooperation across EU countries.

[5 things you should know about solar energy.](#)

Solar energy is one of the world's most abundant and easily accessible sources of renewable power. But how well do you know it? Several distinct technologies harness the sun's
