[A Solar Boiler Is a Type of Solar Thermal Collector](#)

A solar boiler is a device that harnesses the radiant energy of the sun to produce heat, typically for warming a fluid like water or steam. It represents a system focused on the thermal

windows

I have scheduled backup script that makes the database dump. How can I add the date timestamp to the file name? I am talking about Windows and CMD.

[Definition of Fully qualified domain name.](#)

To be less than fully qualified means that the name you're looking at only makes sense within the context of a search-list or default-domain. RFC 1535 was interesting because a lot of us had up until

Solar Water Heating

Thermo Dynamics Ltd. (TDL) has researched and developed a solar water heater for the next generation. This solar water heater is powered by solar electric

[Rules for Active directory user name string.](#)

I have googled but not able to find a proper set of restriction in user name in active directory setting. Please help me in telling what are the special char which are not allowed in Active

[What is the difference between a hostname and a fully qualified](#)

The hostname is just the computer name and the fully qualified domain name is the hostname plus the domain name after it . hostname: bigbox fqdn: bigbox.mynetwork or

User principal name vs SAM account name

I am confused between the user principal name

windows

I'm looking for a command line tool which gets an IP address and returns the host name, for Windows.

(UPN) and SAM account name (SAM). Heres what i know SAM- Pre-windows name, for backward compatibility with Windows NT machines

[Getting "The target account name is incorrect" when accessing a](#)

The 'target account name' refers to the name of the computer you are connecting to. Basically, you are attempting to call the server by a name which it does not recognise. Things to check: Can you

[Find name of Active Directory domain controller](#)

How can I find out the name/IP address of the AD domain controller on my network?
