

Who invented the solar power plant

Overview

Solar power was first discovered by French physicist Edmond Becquerel in 1839 at the young age of 19. At the time, Becquerel was experimenting in his father's lab when he observed the photovoltaic effect, a process that generates electricity when exposed to sunlight.

Who invented the solar power plant

integrationEnvironmental effectsPolitics

The early development of solar technologies starting in the 1860s was driven by an expectation that coal would soon become scarce, such as experiments by Augustin Mouchot. Charles Fritts installed the world's first rooftop photovoltaic solar array, using 1%-efficient selenium cells, on a New York City roof in 1884. However, development of solar technologies stagnated in the early 20th century in the face of the increasing a
